WORK EXPERIENCE

Web Developer (2019 - Present)

As a Web developer, I have developed several responsive and functional web solution that is tailored towards meeting and solving clients needs.

I work with PHP and Python on the Backend with MySQL, SQLite as Database Language and HTML, CSS3, SASS, BOOTSRAP5 and jQuery on the frontend.

I have experience with OOP concepts, APIs, MVCs, SAAS and scalable web Solutions

Technical Support Engineer – Ynet Interactive (2020 - date)

As a Tech support specialist, I have worked with clients and developers to resolve software and application based issues on clients end. I resolve issues via CRM., Emails and calls.

I have 2-3years experience working on and resolving issues on LINUX based servers.

I fix bugs clients encounter when making use of Companys software and I escalate if I am not able to, hereby making sure every technical issue is resolved

I also build cutom modules(scripting) for already existing software to extend their functionalities

I mange projects, deploy and provide support to such projects

I provide support to over 2000 clients in over 100 countries
